a. Reported yield against potential
Reported volume (kL/yr)
Potential, catchment area x rainfall x 0.8 (kL/yr)
1:1
1:4
b. Ratio by evidence tier (bar = median)
Ratio (% of potential)
28%
99%
56%
100% at C = 0.80
Observed (n=7)
Agency-reported (n=9)
Design calc. (n=19)
Observed volume (instrument or tank record)
Agency-reported volume
Design calculation (CSE, CGWB design notes)
